## MONEY, WEIGHTS AND MEASURES.

The monetary unit of Costa Rica is the gold colon (=100 centavo).

For weights and measures the metrical system has been adopted.

In finance of December 4, 1901, relating to the collection of Customs duties and quay dues.

(In *Gaceta* of December 5, 1901.)

The ordinance prescribes that the Customs duties and quay dues are to be deposited by the importers with the Principal Revenue Administration in the form of a receipt for a receipt to be forthwith presented to the National Stamp Office, according to the provisions of Ordinance No. 197 of January 14, 1889, the first paragraph of which is repealed.

The receipt issued by the Principal Revenue Administration shall show name of depositing person or firm, amount of such deposit and Customs house of guarantee.

Requirements as to invoices of goods shipped to Costa Rica.

In virtue of a Law which was promulgated on July 30, 1910, invoices in respect of goods no longer require a Consular certificate. Invoices in triplicate, however, made out in Spanish, dated and signed, should be forwarded by the shippers of goods to the consigne in Costa Rica, even if the goods shipped are of duty on importation into the Republic. The invoices should contain the following particulars:

- Name of shipper, vessel and captain.
- Port of destination.
- Name of consignee (or "to order," as the case may be).
- Name of person or persons for whose account the shipment is made.
- Marks and numbers: the former to be in letters and not in cypher numbers.
- Number of package and a description of them.
- Gross weight of each package in *kilogrammes*.
- Net weight and value of each separate article, if more than one class of article is packed in the same package—if the contents are all of the same kind the net weight need not be stated.
- All charges to the port of destination must be indicated against each separate article, and the totality amount is to be added to the total value of the goods at the foot of the invoice.

By decree dated April 27, 1901, an additional 30¢ is levied upon all imports.

By decree dated January 25, 1913, all imports are subject to a surcharge of 2%.

REPUBLIC OF PANAMA

MONEY, WEIGHTS AND MEASURES.—The monetary unit is the Balboa (100 centesimos). For weights and measures the metrical system is in force.

LAW 39 OF 1915.

The National Assembly of Panama decrees:—

ART. 1.—Foreign merchandise or articles of commerce imported for sale or consumption in the Republic are subject to the payment of a tax called "a commercial tax."

ART. 2.—All merchandise and articles of commerce will be considered as of foreign origin which are imported from other countries, and which may be bought from boats which voluntarily or through necessity touch our ports.

ART. 3.—All merchandise and articles of commerce imported into the Republic from another country must come supported by the following documents legalized by the Panamanian consuls:—The manifest drawn up by the captain of the ship, the purser or agent of the company to which the ship belongs; bills of lading and a detailed invoice of the merchandise. When a ship is despatched by American officials for the ports of Cristobal or Balboa, although these ships may bring merchandise or effects of any class consigned to Colon or Panama, the manifests will always be presented to the said officials at Cristobal or Balboa, but a copy of these manifests will be forwarded to the authorities of the ports of Colon or Balboa, according to the case, for the annotation and watching of the cargo consigned to those ports.

ART. 4.—Imported foreign goods will pay the commercial tax once only upon arrival at the port where they are imported in conformity with the tariff this law establishes.

ART. 5.—For the purpose of collecting the said commercial tax, merchandise or articles are divided into the four following classes:—

- Class 1. Articles free from the payment of the tax.
- Class 2. Articles taxed with 10% and 20%.
- Class 3. Articles taxed with a specific tariff.
- Class 4. Articles whose importation is prohibited.

To Class 1 belong:—

- 5 Machinery for the conservation of fruits prepared in the Republic for exportation, for the conservation of meat and hams, and in general all classes of refrigerators.

ART. 2.—All goods not enumerated in the present Tariff shall be dutiable at the rate of the articles which they most closely resemble; unenumerated articles or goods consisting of various articles shall pay the rate applicable to the predominating material, and failing such predominating material, they shall be dutiable according to the material paying the highest rate of duty.

ART. 3.—The duties shall be payable on gross weight, if the Tariff provides that the goods are chargeable on weight, without any deduction for packing or receptacle. If a receptacle is liable to a higher rate of duty than its contents, it shall be assessed separately.

ART. 4.—Postal parcels shall pay as a minimum the sum of 50 centimes even though the amount of duty may be less, and the general rate shall always apply.

ART. 5.—Imported goods shall pay inclusive of all duties, the rates leviable thereon under the Tariff, besides the quay due of 1 centime per kilogramme, save as to the goods classed under Nos. 1, 103, 105, 106, and 107.

Goods which under contracts or special Laws are admitted duty-free, shall pay the Consular fees, in conformity with the provisions of Law No. 32, dated January 24, 1907, except as to those which such contract or Decree should expressly exempt from payment of said fees.

Spirits and liquors: essences for the manufacture of liquors or perfumes; bitters or apertives, champagne, cocktails &c.; tobacco, cigars and cigarettes.

To Class 4 belong:—

Opium, with the exception of that for medicinal purposes, the orders for which must be given with the permission of the Secretary of Finance, and quantity imported without the previous knowledge of that official will be confiscated by the government.

Arms and elements of war.

False or counterfeit money, and apparatus imported for making money without the express permission of the legal authorities.

The 10% and 20% duty to which merchandise of the second class are subject will be collected on the value shown on the consular invoices, as fixed by the official appraisers, or on the value these fix when they consider the price on the invoice is not in accord with that of the merchandise at the same time and port of shipment. Therefore, every declaration shall be made on the base of the consular invoice visé by the official appraiser or on the value fixed by him.

ART. 12.—The importer of articles who has paid the Treasury the tax treated of in this law will have the right to a return of a proportional part thereof if he proves satisfactorily to the Secretary of Finance and Treasury, with a certificate from the respective chief of customs and other officials, that for any reason these articles have decreased in quantity, either by robbery, breakage, decomposition, or for any other reason are not complete. When merchandise, imports, or articles of any class are re-exported within six months after their importation into the Republic, or sold to vessels passing through the Canal at any time, 95% of the duty paid at the time of importation will be returned to the merchant.

ART. 13.—Import duties will not be returned when re-exportation is made within six months after importation, nor where the value of the goods re-exported is less than 50 balboas.

ART. 15.—In order to re-export, the interested party shall make request to the Treasury General of the Republic or the Administrators of Finance for permission to make the re-exportation, with approval of the Secretary of Finance or the governor as the case may be.

ART. 16.—When the permit is granted, if no objection is made, notice shall be given to the respective inspector of the port, and the shipment of the articles shall take place in his presence or in the presence of the subordinate appointed by him and of another employee of the Treasury office which issued the permit.

ART. 17.—The Treasurer-General or the Administrators of Finance, according to the case, shall issue a permit with the details of the merchandise or articles to be re-exported, their origin, date of importation, vessel, name of the captain, and shall state the port of destination, consignee, number of packages, contents, value, marks, name of the shipper and the person responsible for the exportation. This permit is to be signed by the consular agent of the destination, and the Panamanian consul or consular agent resident there shall authenticate the signature of the said consignee. The Treasurer-General at Panama and the Administrators of Finance at Colon and Bocas del Toro, according to the case, shall fix a time for each re-exporter for the return of the permits so issued, taking into account the distance from the place of shipment to the place of issue.

ART. 18.—Consul or consular agents of the Republic shall collect for the Treasury \$1.00 for the authentication of each signature.

ART. 19.—For the return of 95% of the duties mentioned in Art. 13, an account shall be presented against the National Treasury for the amount of the said duties. The account shall be compared with the settlement made for payment of the said duties at the time of importation, and with the permit mentioned in Art. 17. This account shall be visé by the respective inspector of the port and the Secretary of Finance and Treasury, or the governors in Colon and Bocas del Toro shall order payment to be made.

ART. 20.—In cases where it is known publicly that the ship in which the re-shipment was made has been wrecked, and that the merchandise has been lost, the 95% of the duties shall also be returned. The loss or sinking shall be proved by the testimony of three competent witnesses.

ART. 21.—If merchandise for which a permit for re-exportation is requested is again imported into the Republic, except in the case of *force majeure*, it will pay import duties again. If it is discovered that there was malice in requesting permission for the re-exportation of merchandise covering the fraudulent intention of securing return of duties, the merchandise shall be confiscated and a fine double the value imposed on the person requesting the permit for re-exportation.

ART. 22.—Merchandise arriving on the *Leduno* or a steamer bill of lading en route to foreign countries is not subject to the payment of the commercial tax. With this exception, for the exemption of the payment of the tax, only those goods shall be considered in transit which come to persons or business men established in ports of the Republic, to be sent to another country immediately after arrival, and it is proved that they arrived under these conditions.

ART. 23.—In the cases mentioned in the previous article, the consignee of the articles shall not immediately after their arrival and shall request at the same time permission to effect the re-shipment of the consular documents to prove the effects have arrived in transit. Permission granted, there shall be deposited in the Treasury-General of the Republic, as a bond, the value of the import duties to be paid, which shall be refunded upon presentation of the landing certificates showing that the goods have reached their destination.

ART. 24.—Permits to effect the despatch of merchandise in transit shall be obtained under the form prescribed in Art. 17 of this law.

ART. 25.—The importation of hats or quinquilla re-shipment through the port of Panama, which for some good cause do not come supported by consular documents, remain subject to the payment of the simple consular fees in addition to the commercial tax, and no declaration tending to have merchandise so introduced considered as in transit will be accepted. Every person shall be considered as an importer of hats or quinquilla straw who brings a quantity greater than is considered necessary for his personal use.

ART. 26.—Persons who introduce, or try to introduce secretly, merchandise taxed by this law, or who present invoices or sworn statements in which the value of the articles is altered, or in which one article is substituted for another, or who in any manner attempt to evade the complete payment of the corresponding tax, or who try to introduce or to trade in merchandise of which the importation is prohibited, are

subject to the following penalties: Double duties, a fine of \$100 to \$500 and the confiscation of the merchandise.

ART. 27.—The penalties fixed in the preceding article shall be imposed administratively by the collector of the commercial tax, once the fraud or attempted fraud is proved, without other appeal than that extended by the Secretary of Finance and Treasury. The Superior, having revised in the course of the appeal the proceedings created by the imposition of the fine, and heard the answers of the person fined, will approve, modify, or disapprove the said imposition.

ART. 28.—The penalty of double duties and proportional fine will be imposed in all cases of fraud or attempted fraud. In addition the loss of the merchandise and of the vessel in which it is brought will be jointly decreed when introduced secretly at a port other than that qualified as the destination in the manifest, or at points or hours other than those fixed, or without the corresponding documents. In the case of extraction, shipment, or transportation of foreign merchandise for the coasting

trade, or for re-exportation, made at unqualified ports, at points or hours other than those fixed or without the corresponding documents, and in cases of repetition or bribery, the same penalty will be applied.

ART. 29.—Manifest fees will be collected by the consuls of the Republic, reduced in accordance with the Taft Convention to \$6.00 for the first 100 packages and \$1.50 for each remaining 100 packages; but manifests in which only articles of iron, steel, copper, zinc, wood, tiles and the like are noted will pay only \$6.00 no matter what the quantity shipped.

ART. 30.—In the case of goods despatched by American officials for canal zone ports, with the merchandise or effects of any class destined to Colon or Panama, the consuls of the Republic shall collect the manifest fees from such shipper to Colon or Panama, calculating them according to the consular invoice in which the cargo is detailed.

ART. 31.—Previous dispositions contrary to the present law are revoked.

## TARIFF.]

## GENERAL RULES FOR THE APPLICATION OF THE TARIFF.

*Goods specifically mentioned in the Tariff Index.*

I.—All goods mentioned in the Tariff Index annexed to the Tariff shall pay the duty stipulated in the heading of the Tariff to which they are referred.

*Classification of goods not specified in the Tariff.*

II.—Goods which are not mentioned in the Tariff nor in the Tariff Index shall be classified for duty by analogy or similarity to some class of goods specified in the Tariff, and the rules laid down in the Customs Regulations ("Ordenanza de Aduanas") for the assimilation of unspecified goods shall be followed.

*Definition of the expressions "of all kinds" and "not specially mentioned" found in the Tariff.*

III.—Goods mentioned in the Tariff or in the Tariff Index and accompanied by the words "of all kinds" shall pay the duties stipulated in the heading where they are specified, even if such goods are combined with some other materials, except precious metal. Goods may only contain gold, silver or platinum (without change of Tariff classification) in cases where the Tariff heading covering the goods expressly provides for such combination.

The expression "not specially mentioned" is used to avoid confusion with goods which, though of the same general description or of the same materials, are classified in the Tariff or Tariff Index under a separate heading by reason of certain special features which distinguish them from goods "not specially mentioned".

Thus, in certain cases, goods may be described as "of all kinds, not specially mentioned."

*Classification of articles, not specially mentioned, made of two or more materials.*

IV.—Articles composed of two or more materials, and which are not expressly mentioned in the Tariff or Tariff Index, shall pay the duty applicable to the material which predominates in weight, except in the case of goods containing skin, silk, ornaments or accessories of gold, silver, platinum or gilt or silvered metal.

The predominating material shall only be determined by the Customs in cases where the various materials forming the article can be separated without destroying the article. When this cannot be so done, it is open to the importer, verbally and at the time of Customs clearance, to authorise the separation of the component parts, even if the articles examined are damaged, if his interests are so served, as, for example, in the case of goods (such as padlocks, burners, handles for umbrellas, &c.) which are imported in large consignments which would otherwise pay, in excess duty at the higher rate, a sum obviously greater than the value of the articles examined.

When this examination cannot be made, such articles shall pay the highest rate of duty applicable to the various component parts.

*Classification of articles not fitted together.*

V.—When an article composed of various parts specified in the Tariff or Tariff Index is presented in an unmounted condition, and each part is declared separately, the duties shall be assessed at the rates applicable to each part, even if all the parts are in the same bale, &c., but provided they are wrapped up separately.

*Articles combined with scientific apparatus are subject to duty.*

VI.—Scientific apparatus (such as barometers, thermometers, or other), fitted or mounted in articles such as statues, candelabra, ink-stands, clocks, &c., &c., shall pay the duty applicable to the article of which they form part.

*Net weight.*

VII.—By net weight is to be understood the actual weight of the goods without internal packing and without receptacles or wrappings.

*Legal weight.*

VIII.—By legal weight is to be understood the weight of the articles including that of the internal packing, wrappings, bottles, boxes of cardboard, wool, or tin plate, straw or chip cover, in which the goods are packed inside the outer case which serves as the general receptacle for the goods.

When articles dutiable on legal weight have no interior packing and are imported loose (in bulk) inside the outer receptacle, alone or with the lining or box of zinc sheet or tin plate which is usually placed within the outer receptacle for the better preservation of the contents, the actual weight of the goods shall be taken as the legal weight. In reckoning the weight, no account shall be taken of the loose straw or chip in which parcels may be stowed inside the general or outer receptacle, nor of the weight of such outer case.

*Gross weight.*

IX.—By gross weight is to be understood the weight of the goods including all their internal or outer packings or wrappings, without deduction for any loose straw, &c., mats or hoops.

*Gross weight of goods "in bulk" or in dutiable receptacles.*

X.—Goods dutiable on gross weight shall pay duty on the actual weight of the goods when they arrive without wrappings or packings, or contained in receptacles which are liable to Customs duty.

*Measurements of fringes and hems to be included.*

XI.—When articles with fringes are dutiable by the square metre, the measurements are to include the fringes.

When duty is leviable on the net weight in relation with the square metre, the fringes are also to be included.

In the case of tissues such as handkerchiefs, sheets, towels, &c., having a hem more than 1 cm. in width, the dimensions which are to be declared and which are to serve as basis for the assessment of duty shall include the cloth used for the hems—but only the visible part thereof.

*Ordinary receptacles not to pay duty apart from contents.*

XII.—As ordinary receptacles shall be regarded jars, bottles or flasks of earthenware or glass, drums of iron, zinc, tin, copper or lead, boxes of wood, cardboard or tin plate, &c., which are suitable for the goods which they contain and which do not, in themselves, constitute merchandise imparting an augmented value to the contents, and which have no special use apart from the contents.

When goods contained in ordinary receptacles are dutiable on net weight, number or measurement, such receptacles shall not be subject to any import duty.

If the goods contained therein are dutiable according to gross weight, then such ordinary receptacles shall pay duty at the rate applicable to the contents.

*Special receptacles which are liable to higher duties than their contents are to be declared separately.*

XIII.—Receptacles other than the common receptacles referred to in Rule XII, which obviously do not correspond with the goods which they contain (whether because they possess a separate commercial value, or because they are "fancy" or "luxury" packing, or because they can be used otherwise than as packings), and which, taken separately, would be subject to a higher rate of duty than the contents, must be declared separately for the purpose of the levy of duty at the appropriate rate.

*Specified outer-packings to be dutiable.*

XIV.—When articles specified in the Tariff (such as money boxes, trunks, valises, furniture, &c.), as imported, constitute outer packings of other goods, they shall pay the duty to which they are liable according to the Tariff, and no allowance shall be made in respect thereof as tare.

*Classification of cloths or cloth sacks used for covering goods.*

XV.—Cloths which are used as protective coverings for goods inside packages must be declared and must pay the duty prescribed therefor in the Tariff whatever be the quantity or kind of the cloth, except in the case of waterproof, oiled or tarred cloths which serve the sole purpose of protecting the goods from outside moisture and are present only in a quantity strictly necessary for this purpose. Nor is any deduction for payment of duty necessary in respect of coarse interior sacks of late cloth or of white and plain cotton cloth, when goods have a double receptacle, as in the case of paraffin wax, sulphur, &c., where there is an inner sack and also an outer one.

When goods imported in double packing are dutiable on legal weight the interior sack shall be included in such legal weight.

*Cloths and articles of linen mixed with cotton.*

XVI.—Cloths and articles of linen, hemp or similar vegetable fibres containing an admixture of cotton in any proportion, which are not provided for in the Tariff or Tariff Index, shall pay the duties applicable to cloths and articles of pure linen.

*Tissues of wool with admixture other than silk or precious metal.*

XVII.—Tissues of wool with showers ("lucen") of other material (except precious metal), and also those tissues which contain, in the texture, an admixture of cotton, artificial silk, linen, hemp or other similar vegetable fibre, in any proportion, shall pay the duty applicable to tissues of pure wool.

*Ribbons of mixed silk.*

XVIII.—Only ribbons in which the warp or weft is composed wholly of threads of cotton, linen or wool shall be regarded as ribbons of silk with admixture of cotton, linen or wool.

*Tissues and articles of silk with admixture of cotton, linen, or wool shall be considered as those in which the admixture occurs throughout the texture or in various parts thereof. Those which contain such admixture only in the borders shall pay the duties applicable to cloths or articles of pure silk.*

XIX.—As *"cortes de vestido"* are to be considered those articles which (packed in cardboard boxes or otherwise) are so disposed, pinned or tacked (showing the shape of the blouse or skirt, &c.), and of which the trimmings are so arranged that the article, as presented to the Customs, is properly displayed and can be seen to be intended to form a particular garment. Otherwise, if it is only a question of tissues not disposed in the form of a garment and with trimmings separate or so arranged that form a separate use may be made of them, then the tissue shall be subject to duty according to kind, and the trimmings shall pay duty separately, according to kind.

*Classification of cotton or linen handkerchiefs.*

XXI.—Handkerchiefs of cotton or linen tissue, even if having merely an edging of tissue other than plain, or of open-work or embroidered tissue, are to be regarded, and assessed for duty, as handkerchiefs made of tissue other than plain, or of open-work or embroidered tissue, as the case may be.

Handkerchiefs are to be regarded as embroidered if they have "alforzas" or embroidery, however small these may be, and even if they only occur in the form of initials or ornaments in one corner.

When handkerchiefs have a plain chain-stitch in place of the hem, no account shall be taken of such chain-stitch, and the handkerchiefs shall pay the duty applicable, according to the kind of the cloth.

Handkerchiefs which have undergone only the drawn work necessary to form the needlework known as "dobladillo de ojos" shall not be considered as open-work.

White or design or working in colour shall be classed as handkerchiefs made of coloured tissues.

*Settings and mountings of earthenware and glassware.*

XXII.—By "setting" or "mounting" is to be understood the metal part which is fixed to an article of glass or porcelain, which serves as an ornamentation or as a support, and which forms an integral part of the article.

The following are not regarded as "settings" or "mountings," viz.: such pins or screws which connect two or more parts, small knobs, nor lids of flasks, bottles, vases, jars or inkstands.

*Classification of articles of metal painted or furnished with metallic coating.*

XXIII.—Except in the case of gilt or silvered metal wares and of tinplate in painted sheets, all articles of metal coated with aluminium, copper or tin, or nickel, or painted, shall pay the duty assigned to articles of the metal of which they are made.

• The expression "*cortes de vestido*" occurs in Tariff Nos. 343-4, 396-7, 434-5 and 490-1. Regard should be had to the explanation contained in Note XX, when referring to these Tariff Nos.

*Specified spare repair parts are dutiable separately.*

XXIV.—When articles specified in the Tariff are imported, as accessories, with machinery and apparatus, and in larger quantities than are absolutely necessary for the installation of the machine or apparatus, such as screws, bolts, tubes, wrenches, &c., such excess quantities shall be subject to duty at the rate prescribed for such articles.

*Articles subject to various rates of duty.—Exceptions in the Index.*

XXV.—In all Tariff headings where an article is subject to different rates of duty, varying with the weight of the articles, the duties shall be assessed in the manner indicated by applying the highest rate of duty to the limit of weight prescribed therefor, and in the case of articles whose net weight exceeds the lower limit, by applying the lower duty or duties, to the number of kilograms remaining. In these latter cases, the consignee shall declare the number of complete articles imported. Goods which are specifically referred to (in the Tariff Index) to a particular heading of the kind referred to above shall only pay the duty applicable to that heading, whatever the weight of the individual articles may be.

*Method of packing articles of cotton, wool, linen, silk, and jewellery of precious metal.*

XXVI.—In the case of articles of cotton, linen, wool or silk, such as yarns in balls or in skeins, corals, lace, ornaments, trimmings, fringes, ribbons, embroidered insertions, or any other manufactures which are imported in the form of packages, packed by applying the same rate of duty, the only rates of duty, are not packed so that each packet or carton contains only goods coming under one Tariff heading, the highest duty applicable shall be levied, even if the Customs declaration specifies the weights, measurements, quantities, names, materials and kind of each of the different classes of goods.

In the same way, when imported jewellery and wares of precious metals are packed together in boxes, packets or cartons, and there is not marked on each receptacle the kind and net weight of the different kinds of wares contained therein, even if exact particulars for the determination of the duties are given in the Customs declaration, the contents of each box, packet or carton shall pay the duty prescribed by the Tariff for the most highly taxed article contained therein.

Cases with linings of leather or silk shall be subject to duty separately when the jewellery is dutiable, but if the jewellery is not dutiable on legal weight, the weight of the cases shall be included in such legal weight, unless the cases are packed separately from the jewellery.

*Embroidery on tissues and articles.*

XXVII.—Embroidery is a working in relief executed by hand or by mechanical means by means of threads independent of the tissue, on cloth which is completely finished. For the purpose of the Customs Tariff Law, tissues and articles shall be considered as embroidered if they have designs in relief, filled in or outlined, formed by means of threads, chain stitches, or cords of any material or by means of applications of glass, porcelain, metal, rubber, composition, or of cuttings of other tissues. As embroidered tissues or articles are to be regarded those which have embroidered patterns either in the borders (forming an edging) or over the whole of the texture, and also those which, as in the case of towels,

aprons, sheets, table covers, pillow cases, &c., only have embroidered letters or ornaments in the corners or on some portion of their surface.

In the case of embroideries made with metal threads, the core (nucles) shall not be taken into account, even if it consists of silk. The same rule applies in the case of embroideries made with covered cording, so that embroidery made with cording covered with silk is regarded as silk embroidery, even if the core is of cotton, wool or linen.

*Fittings or accessories of precious metal, of gilt or silvered common metal, of silk or of skin, contained in goods specially mentioned in the Tariff.*

XXVIII.—Inasmuch as the Tariff specially provides for the Customs classification of (and prescribes special duties for) articles containing precious metal, silk, skin, or gilt or silvered metal parts, the negative phrases, such as "not being of gold, silver or platinum," "not gilt nor silvered," "not containing silk or skin," are omitted from the Tariff headings where articles not including such materials are specified. Articles or wares having accessories or ornaments of the materials in question are only included in the headings relating to the articles or wares when the heading expressly and definitely so stipulates; except in cases where the phrase "of all kinds" is used in reference to articles which, in accordance with Rule III. above, may contain silk, skin, or parts of gilt or silvered common metal.

To the case of articles for which there is an exclusive classification, such as belts, suspenders, garters, braces, corsets, umbrellas, &c., and in the make-up of which metal fittings are necessary, the presence of such fittings (unless they are of precious metals), including those of gilt or silvered metals, does not affect the Tariff classification of the articles, since in cases where the presence of metal accessories does affect the classification of goods (as in the case of ribbons, trimmings, &c.), the Tariff contains express provision to that effect.

*Declaration of cotton thread on reels.*

XXIX.—When cotton thread is imported on reels, the declaration must specify the number of reels contained in each package, and the length of thread on each reel.

*Classification of samples and cases of samples.*

XXX.—Samples which have been rendered useless as merchandise (viz. those referred to in Tariff No. 699) shall enjoy the exemption from import duty accorded by the General Customs Regulations.

Cases of samples, and samples of goods, complete or capable of being used, and samples of wines, spirits, perfumery, &c., must be declared with all the particulars required by law in the case of ordinary goods, and such samples shall pay the duties applicable, and it is forbidden in any case to render the goods useless at the time of Customs clearance, by means of cutting, perforation or otherwise.

When cases of samples contain handkerchiefs, shawls, socks or stockings, shirts, fancy goods, hardware or small wares, and, in general, all articles which, not being rendered unfit for use, are subject to various rates of duty, and are not properly separated when presented to the Customs, the whole collection of samples is to pay the rate of duty applicable to the most highly taxed article comprised in the collection.

Note.—All dutiable goods imported or exported by parcel post shall be subject to a surtax of 25 per cent. of the total amount of duty.

The net amount of all such bounties or grants shall be from time to time ascertained, determined, and declared by the Secretary of the Treasury, which shall make all needful regulations for the identification of such articles and merchandise and for the assessment and collection of such additional duties.

F. Subsection 1. That all articles of foreign manufacture or production, which are capable of being marked, stamped, branded, or labelled, without injury, shall be marked, stamped, branded, or labelled in legible English words, in a conspicuous place that shall not be covered or obscured by any subsequent attachments or arrangements, so as to indicate the country of origin. Said marking, stamping, branding, or labelling shall be as nearly indelible as practicable, inasmuch as the nature of the article will permit.

All packages containing imported articles shall be marked, stamped, branded, or labelled so as to indicate legibly and plainly, in English words, the country of origin and the quantity of their contents, and not marked in accordance with the directions prescribed in this section no articles or packages shall be delivered to the importer.

Should any package of imported merchandise be marked, stamped, branded, or labelled so as not accurately to indicate the quantity, number, or measurement actually contained in such article or package, no delivery of the same shall be made to the importer until the mark, stamp, brand, or label, as the case may be, shall be changed so as to conform to the facts of the case.

The Secretary of the Treasury shall prescribe the necessary rules and regulations to carry out the foregoing provision.

No such articles, whether imported separately or contained in packages with other goods entitled to entry, shall be admitted to entry; and all such articles shall be proceeded against, seized, and forfeited by the courts of law. No such prohibited articles or packages in which they are contained in the course of importation shall be detained by the officer of customs, and proceedings taken against the same as hereinafter prescribed, unless it appears to the satisfaction of the collector of customs that the obscene articles contained in the package were inclosed therein without the knowledge or consent of the importer, owner, agent, or consignee: *Provided*, That the drugs herebefore mentioned, when used in bulk and not put out for any of the purposes herebefore specified, are excepted from the operation of this subsection.

G. Subsection 2. That whoever, being an officer, agent, or employee of the Government of the United States, shall knowingly aid or abet any person engaged in any violation of any of the provisions of law prohibiting importing, advertising, dealing in, exhibiting, or sending or receiving by the post, or by any other means, public notice of such articles, or in preventing conception or procuring abortion, or other articles of indecent or immoral use or tendency, shall be deemed guilty of a misdemeanor, and shall for every offence be punishable by a fine of not more than \$5,000, or by imprisonment at hard labour for not more than ten years, or both.

G. Subsection 3. That any circuit or district judge of the United States, within the proper district, before any complaint in writing of any violation of the preceding sections is made, to the satisfaction of such judge, and founded on knowledge or belief, and if upon belief, setting forth the grounds of such belief, and supported by oath or affirmation, of the complainant, may issue, conformably to the Constitution, a warrant directed to the marshal or any deputy marshal in the proper district, directing him to search for, seize, and take possession of any such article or articles, and to return the same to the court, and to suspend the same until immediate return thereof, to the end that the same may be condemned and destroyed by proceedings, which shall be conducted in the same manner as other proceedings in the case of municipal seizure, and with the same right of appeal or writ of error.

H. Subsection 1. That the importation of neat cattle and the hides of neat cattle from any foreign country into the United States is prohibited: *Provided*, That the prohibition of this section shall not apply to any foreign country or countries, or any parts of such country or countries, whenever the Secretary of the Treasury shall officially determine, and give public notice thereof, that such importation will not tend to the introduction or spread of contagious or infectious diseases among the cattle of the United States; and the Secretary of the Treasury is hereby authorized and empowered, and it shall be his duty, to make such necessary orders and regulations to carry out this section, and to suspend the same as herein provided, and to send copies thereof to the proper officers in the United States and to such officers or agents of the United States in foreign countries as he shall judge necessary.

This discriminating duty shall not apply to goods, wares, or merchandise, which shall be imported in vessels not of the United States entitled at the time of such importation by treaty or convention or Act of Congress to be entered in the ports of the United States on payment of the same duties as shall then be payable on goods, wares, and merchandise imported in vessels of the United States, nor to such foreign products or manufactures as shall be imported from such contiguous countries in the usual course of strictly retail trade.

J. Subsection 2. Section 5. That all materials of foreign production which may be necessary for the construction of naval vessels or other vessels of the United States, vessels only of the United States, or for the repair of such ownership, or for the purpose of being employed in the foreign or domestic trade, and all such materials necessary for the building of their machinery, and all articles necessary for their outfit and equipment, may be imported in bond under such regulations as the Secretary of the Treasury may prescribe; and upon proof that such materials have been used for such purposes no duties shall be paid thereon.

2. If any merchandise be found on board any vessel arriving in the Canal Zone from a foreign port, which is not included in her manifest, the master of such vessel shall be liable to a penalty equal in amount to the value of the merchandise not manifested, and all such merchandise, belonging to or consigned to the officers or crew of the vessel, shall be forfeited, provided, however, that the penalty authorized by this section shall not be imposed if it should be made to appear to the chief Customs officer, at the port of entry, or to the court in which the trial shall be held, that no part of the cargo has been unladen, except as accounted for in the master's report, and that the errors and omissions in the manifest were made without fraud or collusion; in such case the master may be allowed to correct his manifest by means of a post-entry. ## PORTO RICO

By an Act approved April 12th, 1900, which entered into force May 1st, 1900, it was enacted that "the same tariffs, customs and duties shall be levied, collected, and paid upon all articles imported into Porto Rican ports from ports other than those of the United States, which are required by law to be collected upon articles imported into the United States from foreign countries:—Provided, That on all coffee in the bean or ground imported into Porto Rico there shall be levied and collected a duty of 5 cents per pound, any law or part of law to the contrary notwithstanding."

The internal revenue laws of the United States do not apply to Porto Rico, the exception being made by act of Congress. The Insular Government makes its own internal revenue laws, and it should be noted that the excise taxes are levied in Porto Rico upon the following-named articles, whether produced in the island or brought or imported therein, according to the rates herein specified:

1. On all distilled spirits produced in Porto Rico, or imported or brought into Porto Rico, a tax of 50 cents on each liter or fraction thereof; *Provided*, That for the purposes of this Act all spirituous liquors, except as otherwise provided for in this Act, produced in Porto Rico, or brought or imported into Porto Rico, of which, exclusive of water, distilled spirits form the chief component, shall be regarded as distilled spirits; and, *Provided, further*, That when the distilled spirits contained in any such spirituous liquor do not form the chief component thereof, exclusive of water, the tax shall be paid at the rate of 2 cents per liter or fraction thereof, on the amount by volume of any distilled spirits which such spirituous liquors may contain and on which no tax has been paid under any of the provisions of this Act.

For the purpose of this Act "chief component" shall be held to be that substance which determines the general use of the article.

2. On all beer, lager beer, ale, porter and other similar fermented liquors, by whatever name they may be known, produced in Porto Rico, or brought into Porto Rico, and sold in bulk in containers of not less than 15 liters capacity, a tax of 5 cents for each liter or fraction thereof; and on all beer, lager beer, ale, porter and other similar fermented liquors, by whatever name they may be known, produced in Porto Rico, and sold in bottles, or brought into or imported into Porto

Rico, and sold in bottles, a tax of 10 cents for each liter or fraction thereof; *Provided*, That beer which is to be bottled from other containers, on which the above-mentioned tax of 5 cents per liter shall have been paid, shall further pay 3 cents a liter or fraction thereof and no more.

3. Note.—Goods not enumerated in the present tariff shall be  
dutiable according to the invoice price (provided that such price  
corresponds to the average price of such goods at the place of  
shipment), with an increase as stipulated hereinafter, in such  
manner that the total invoice value shall equal the wholesale price  
of the goods in St. Croix. This increase shall be 15% of the in-  
voice price for goods imported from St. Thomas with an invoice  
from said island, and 25% for all other goods. In default of an  
invoice, the Customs shall appraise the value of the goods, either  
according to the wholesale price in the island, or according to the  
ordinary retail price less 25% of such price. In both cases the  
Customs duties must not be included in the appraised value.

# AN ACT TO RAISE REVENUE FOR THE PHILIPPINE ISLANDS, AND FOR OTHER PURPOSES.

(Approved August 5, 1909.)

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled:

That on and after 60 days following the passage of this Act, except as otherwise specifically provided in this Act, there shall be levied, collected, and paid, upon all articles, goods, wares or merchandise of every kind and class entering the jurisdiction of the Philippine Islands, from any place or places, including the United States and its possessions, and in any manner whatsoever, either with intent to unlade therein, or which, after such entering, are consumed therein, or become incorporated into the general mass of property within said islands, the rates of import duty which are by this Act specifically provided.

Sec. 2.—That the following rules shall be observed in the construction and enforcement of the various provisions of this Act:

## GENERAL RULES.

### TREATMENT OF TEXTILES.

Rule 1.—*Number of threads and establishment thereof.* By the number of threads in a textile shill, unless otherwise stipulated, he meant the total number of all threads contained in the warp and weft thereof in a square of 6 millimeters. Warp is the total number of threads which lie longitudinally in a textile, whether they form the foundation thereof or have been added thereto. Weft shall be considered the total number of threads which cross the warp, whether from selvage to selvage or not. To determine the number of threads in a textile, and the proportion thereof subject to the highest rate of duty, a "thread counter" shall be used.

Should a textile be more closely woven in some parts than in others, the number of threads in the most closely woven part and in the most loosely woven part of the body of the textile shall be ascertained, and the average number of threads resulting shall serve as a basis for levying duty.

Threads shall be counted on the finished side of the textile, if the nature thereof permits, otherwise on the reverse side. If necessary, to ascertain the number of threads, the nap shall be removed or a sufficient part of the textile unravelled.

Should this be impossible without damaging a made-up article, the textile shall be subject to the highest rate of duty applicable in the group to which it belongs, and if the textile be mixed, it shall be dutiable at the rate applicable to the most highly taxed component material in the exterior of the article.

Rule 2.—*Surtaxes: (a) How computed.*—The surtaxes applicable on account of broché, metal threads, embroidery, trimming or making-up shall be computed on the primary duties leviable on the textile including therewith the mercantile duties in case, and on account of admixture.

(b) *On goods dutiable ad valorem.*—Articles of any character, dutiable ad valorem rate, shall not be subject to any of the surtaxes provided herein, unless the application of such surtaxes to said ad valorem rate is specifically provided for in this Act.

Rule 3.—*Admixtures of two materials.*—Textiles composed of two materials shall be dutiable as follows:

(a) Cotton textiles containing threads of other vegetable fibres, and in which the total number of such threads, counted in the warp and weft, does not exceed one-fifth of the total number of threads composing the textile, shall be dutiable under the corresponding paragraphs of Class V., with a surtax of 15 %.

When the number of threads of other vegetable fibre exceeds one-fifth of the total, the textile shall be dutiable under the corresponding paragraph of Class VI.

Cotton textiles containing threads of wool, hair, or wastes of the same materials, and in which the total number of such threads, counted in the

warp and weft, does not exceed one-fifth of the total number of threads composing the textile, shall be dutiable under the corresponding paragraphs of Class V., with a surtax of 35 %.

When the number of threads of wool, hair, or their wastes exceed one-fifth of the total, the textile shall be dutiable under the corresponding paragraph of Class VII.

Cotton textiles containing threads of silk, and in which the total number of such threads, counted in the warp and weft, does not exceed one-fifth of the total number of threads composing the textile, shall be dutiable under the corresponding paragraphs of Class V., with a surtax of 70 %.

When the number of threads of silk exceeds one-fifth of the total, the textile shall be dutiable under the corresponding paragraph of Class VIII.

The provisions of this Rule shall not apply to pile fabrics, knitted or netted stuffs, tulles, laces, or blondes (Rule 6), or to ribbons, galloons, braids, tape, or trimmings (Rule 7).

(b) Textiles of vegetable fibres (except cotton), containing threads of wool, hair, or their wastes, and in which the number of such threads counted in the warp and weft, does not exceed one-fifth of the total number of threads composing the textile, shall be dutiable under the corresponding paragraphs of Class VI., with a surtax of 40 %.

When the number of threads of wool, hair, or their wastes, exceed one-fifth of the total, the textile shall be dutiable under the corresponding paragraph of Class VII.

Textiles of vegetable fibres (except cotton), containing threads of silk, and in which the number of such threads, counted in the warp and weft, does not exceed one-fifth of the total number of threads composing the textile, shall be dutiable under the corresponding paragraphs of Class VI., with a surtax of 60 %.

When the number of silk threads exceeds one-fifth of the total, the textile shall be dutiable under the corresponding paragraphs of Class VIII.

The provisions of this Rule shall not apply to pile fabrics, knitted or netted stuffs, tulles, laces, or blondes (Rule 6), or to ribbons, galloons, braids, tape, or trimmings (Rule 7).

(c) Textiles of wool, or hair, containing threads of silk, and in which the number of such threads exceeds one-fifth of the total number of threads composing the textile, shall be dutiable under the corresponding paragraphs of Class VIII.

Rule 4.—*Admixtures of more than two materials.*—Textiles composed of more than two materials shall be dutiable as follows:

(a) Textiles of an admixture of wool and cotton, or of wool and other vegetable fibres, containing threads of silk, but in which the number of silk threads, counted in the warp and weft, does not exceed one-fifth of the total number of threads composing the textile, shall be dutiable under the corresponding paragraphs of Class VII.

When the number of silk threads exceeds one-fifth of the total, the textile shall be dutiable under the corresponding paragraph of Class VIII.

(b) Textiles of an admixture of cotton and other vegetable fibres, together with threads of silk, but in which the number of silk threads counted in the warp and weft, does not exceed one-fifth of the total number of threads composing the textile, shall be dutiable under the corresponding paragraphs of Class VI., and in addition shall be liable to a surtax of 70 % for the threads of silk.

When the number of silk threads exceeds one-fifth of the total, the textile shall be dutiable under the corresponding paragraph of Class VIII.

(c) Textiles of an admixture of wool, cotton and other vegetable fibres, containing no silk threads, and in which the number of threads of wool counted in the warp and weft, does not exceed one-fifth of the total number of threads composing the textile, shall be dutiable under the corresponding paragraphs of Class VI., and in addition shall be liable to a surtax of 40 % for the threads of wool.

When the number of threads of wool exceeds one-fifth of the total, the textile shall be dutiable under the corresponding paragraph of Class VIII.

Rule 5.—*Silk T-ruties.*—All textiles containing silk threads, the number of which, counted in the warp and weft, exceeds one-fifth of the total number of threads composing the textile, shall be deemed textiles of silk.

EXCEPTIONS.

Rule 6.—*Pile fabrics and knitted and netted goods*.—Flushes, velvets, elevents, all pile fabrics, all kinds of knitted or netted stuffs, tapes, aces and blenders, containing an admixture of textile materials, shall be dutiable at the rate applicable to the most highly taxed components material, whatever be the proportion of such material in the article.

Rule 7.—*Ribbons, galloons, braids, tape and trimmings*.—Ribbons, galloons, raids, tape and trimmings, containing an admixture of textile materials, shall be dutiable at the rate applicable to the most highly taxed component material, whatever be the proportion of such material in the article. When any of these articles contain metal threads in any proportion they shall be dutiable under the corresponding paragraphs of Class VIII.

Rule 8.—*Broches*.—Broches dutiable under Class V., with silk, shall be liable to the duties leviable thereon, with a surtax of 15 %.

Broches, dutiable under Class VI., with silk, shall be liable to the duties leviable thereon, with a surtax of 30 %.

Broches are textiles with ornamental figures formed by means of a shuttle at time of weaving, and in such manner that the threads forming the figure occupy only the space thereof.

Rule 9.—*Embroidery and trimmings*.—Textiles embroidered by hand or machine after weaving, or with application of trimmings, shall be liable to the duties leviable thereon, with a surtax of 30 %.

If the embroidery contains threads of purl or common metals or of silver, or spangles of any material other than gold, the surtax shall be 60 % of the duties applicable to the textile.

When the thread, purl, or spangles are of gold, the surtax shall be 100 %.

Embroidery is distinguished from patterns woven in the textile by the latter being destroyed by unravelling the web of the textile, while embroidery is independent of the warp and weft and cannot be so unraveled.

Rule 10.—*Metallic threads*.—Textiles composed exclusively of metallic threads shall be dutiable under Class VIII.

Textiles or articles (except those provided for in Rules 7 and 9 hereof), dutiable under Classes V., and VI., containing threads or purl of common metals or of silver, shall be liable to a surtax of 50 % of the duties leviable thereon.

If the threads or purl are of gold the surtax shall be 100 %.

Rule 11.—*Made-up articles*.—Textiles, dutiable under Classes V. and VI., entirely or partially made up into common sacks (except gunny-sacks) or tarpaulins, shall be liable to the duties applicable thereto, with a surtax of 15 %.

Shawls, including those called "mantones" and "paboles" traveling bags, sarongs, patadoones, counterpane, sheets, towels, table cloths and napkins, veils, fichus, and handkerchiefs, shall, for the making of these articles imported in the piece, uncut, shall not be considered as made-up, except in those cases where the line of separation between them indicated by unweaved spaces.

In the merchandise was actually purchased, the declaration shall also contain a statement that the amount shown and the currency stated in such invoice is that which was actually paid for the merchandise by the purchaser. Said declaration shall be duly sworn to by the purchaser, manufacturer, seller, owner, or agent before the officer to whom produced.

### ARGENTINE REPUBLIC

The Tariff system adopted in the Argentine Republic is as follows: the Customs Law prescribes *specific* duties only in the case of articles of food and drink, tobacco, and a short list of miscellaneous articles, and *ad valorem* duties in the case of all other articles. The *ad valorem* duties, however, are assessed, not on the declared value of the goods, but on the official valuation set out in the Valuation Tariff; and consequently the duties given in the following lists have been calculated by applying the *ad valorem* rates to the official valuations, except as regards those articles for which, as mentioned above, specific duties are fixed by the Customs Law.

It should be noted that the Argentine Budget Law for 1902 imposed an *additional* duty of 2 per cent. *ad valorem* on all imported goods subject to a duty of 10 per cent. *ad valorem* or more. This surtax is still in force, and is *included* in the rates given in the present Return.

Articles imported in two or more receptacles are weighed with immediate receptacle, without tare allowance, and the weight of such articles must be declared inclusive of the immediate receptacle.

By immediate receptacle is understood the earthenware or coarse paper tin, glass, packet, wood, metal, or box which contains the merchandise.

Ten is dutiable on the net weight.

*Saddlers' Wares.*—As regards articles dutiable by weight, the dutiable weight includes the paper, boxes and wrappings, as also the bales which articles are imported in this form.

*Hardware and Machinery: Arms.*—The articles included under these sections, if imported in bales, sacks or rolls, are weighed gross; articles imported in any other form are weighed with the paper, wrappings, earthenware or wooden boxes, reels or bobbins, except in the case of the iron mentioned articles, for which tare allowances are made:—

*Tissues.*—All tissues dutiable by weight are weighed with their boxes and wrappings, and with the wood and card-board placed in the interior of the pieces, except in the case of silks, which are weighed with the paper wrappings only.

MONEY, WEIGHTS, AND MEASURES.—The monetary unit of Bolivia is the "Boliviano" = 100 centavos. For weights and measures Bolivia has adopted the metrical system.

The goods in this tariff which are dutiable on gross weight are indicated by the letters (g. w.) immediately following the text. The letters n. m. mean "not specially mentioned."

#### RULES FOR THE APPLICATION OF THE VALUATION TARIFF.

(Act of December 31, 1905.)

ART. 15.—The charge for the deposit of goods in Government warehouses shall be 50 centavos per hundred kilos, or fraction thereof. From the date of the presentation of the clearance certificate warehouse rent shall cease, even though the goods be not taken out.

ART. 16.—Goods subject to "appraisement" or "not specified in the tariff" shall be valued at their wholesale market price. In order to fix at this appraisement the Consular invoice shall be taken as a basis and its amount be increased by 20% for freight and other charges from the market of origin, provided these expenses have not already been included in the invoice.

In making the above calculation, the original invoice which every merchant is required to have in his possession must be produced, together with the corresponding Consular invoice; should there be a discrepancy in the value of the two invoices, assessment shall be made according to the invoice showing the largest amount. If the importer fails to produce the original invoice, he will be liable to a fine of 4% on the official value declared in the Consular invoice.

ART. 17.—For the application of the valuation tariff the following rules shall be in effect:

(1.) In every case where the valuation of a tissue is based on the number of threads, the latter shall be reckoned, by means of the glass called a "thread counter," in a square of 6 millimetres the side.

(2.) By "gross weight" is understood the weight of the package as made up for transporting the goods. Valuation by gross weight shall also be adopted in the case of goods generally conveyed loose, in bulk or bound together in bundles.

(3.) The expression "including packages" applies to goods valued according to their actual weight, together with the weight of containers and packages in which inclosed or wrapped, but not including barrels, casks, cases of wood, tin or sheet iron, with the cross pieces and outside packing cloth necessary for the transport. This rule shall not be applicable to goods for which the mode of weighing has been expressly stipulated in the Tariff.

Should goods dutiable inclusive of weight of packages be imported

loose, in bulk or fastened together in bundles, they shall be appraised according to net weight.

(4.) "Weight, including receptacles," means the weight of the goods inclusive of immediate receptacle containing them, and adhering to the goods even if used for the transport.

(5.) Merchandise for which the Tariff does not expressly stipulate another mode of weighing, shall be appraised at net weight.

(6.) When goods dutiable at gross weight are imported in the same package with other goods assessed or tariffed on some other basis, the weight of the goods including interior receptacles and packages shall be increased by 3% if imported in boxes and by 6% if imported in bales; save that in both cases the exterior receptacle above referred to in Article 3 shall not be taken into consideration.

(7.) Fractions of a centavo, amounting to 50 centimes and above, shall be considered as a full centavo, and fractions of less than 50 centimes shall not be taken into consideration.

(8.) The denomination appearing at the head of each group consisting of one or more subdivisions of an item, shall be deemed repeated at the commencement of each subdivision.

(9.) As "unfinished and untrimmed hats" shall be considered hats which are not provided with linings, ribbons or borders, notwithstanding they may have been ironed; this shall embrace hats furnished with a gauze or paper wrapper for the sole purpose of protecting them from damage.

(10.) In the Tariff "common metal" shall be held to be any metal except gold, silver or platinum.

(11.) The fibres or materials of which tissues are composed shall be considered as of higher or lower value, according to the following order:

1. Silk, animal or artificial.
2. Wool or hair.
3. Linen.
4. Cotton.
5. Ramie, hemp, jute and other vegetable fibres.

(12.) By "warp" must be understood the joint number of threads and filaments which form the length of the tissue, and by "weft" or "wool" the joint threads or filaments crossing the warp.

The method of forming the warp determines the classification upon which the appraisement of the tissue is made.

(13.) A tissue shall be understood as "mixed" when some other material enters into the composition of the threads of the tissue in a less proportion than the principal.

ART. 37.—Alimentary or edible products and simple or compound medicines, liquid or solid, which have been damaged at sea or during voyage, or through natural causes, may not be cleared or sold for consumption by auction until after examination by experts and when it be proved that the deterioration does not render the goods noxious to public health.
